# INTERNATIONAL AS FURTHER MATHEMATICS

(9665/FM02) Unit FPSM1 – Pure Maths, Statistics and Mechanics

Friday 31 May 2019

07:00 GMT

Time allowed: 1 hour 30 minutes

**Materials**

- For this paper you must have the Oxford International AQA booklet of formulae and statistical tables (enclosed).
- You may use a graphics calculator.

**Instructions**

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

**Information**

- The marks for questions are shown in brackets.
- There are three sections to this paper.
- The maximum mark for this paper is 80. There are 40 marks for **Section A**, 20 marks for **Section B** and 20 marks for **Section C**.

**Advice**

- Unless stated otherwise, you may quote formulae, without proof, from the booklet.
- Show all necessary working; otherwise marks may be lost.

**Section A****Pure Maths**Answer **all** questions in the spaces provided.

- 1** A curve passes through the point (5, 7.2) and satisfies the differential equation

$$\frac{dy}{dx} = \sqrt{x + 2y}$$

Use Euler's step-by-step method with a step length of 0.05 to estimate the value of  $y$  when  $x = 5.1$

Give your answer to four decimal places.

ANSWER IN THE SPACES PROVIDED**

**Turn over ►**

0 3

**2** The variables  $x$  and  $y$  are related by an equation of the form

$$y = ab^x$$

where  $a$  and  $b$  are constants.

Let  $Y = \log_{10} y$

**2 (a)** Show that there is a linear relationship between  $x$  and  $Y$ .

**[3 marks]**

---

---

---

---

---

---

---

**2 (b)** It is given that  $y = 27$  when  $x = 3$  and that  $y = 12$  when  $x = 8$

Use the linear relationship from part **(a)** to find the value of  $a$  and the value of  $b$ .

Give your answers to 3 significant figures.

**[5 marks]**

---

$a =$  \_\_\_\_\_

$b =$  \_\_\_\_\_

8

**Turn over for the next question**

**Turn over ►**

**3** The matrices **A**, **B** and **C** are defined by

$$\mathbf{A} = \begin{bmatrix} 1 & 0 \\ 0 & 2 \end{bmatrix}, \quad \mathbf{B} = \begin{bmatrix} 4 & 0 \\ 0 & 4 \end{bmatrix} \quad \text{and} \quad \mathbf{C} = \begin{bmatrix} 0 & 1 \\ 1 & 0 \end{bmatrix}$$

Describe fully the geometrical transformation represented by each of the following matrices:

**3 (a) (i) A**

**[2 marks]**

---

---

---

---

Answer \_\_\_\_\_

**3 (a) (ii) B**

**[2 marks]**

---

---

---

---

Answer \_\_\_\_\_

**3 (a) (iii) C**

**[2 marks]**

---

---

---

---

Answer \_\_\_\_\_

- 3 (b)** The matrix  $\mathbf{M}$  represents a stretch followed by an enlargement, and one of the following statements is true.

$$\mathbf{M} = \mathbf{AB} \quad \mathbf{M} = \mathbf{BA} \quad \mathbf{M} = \mathbf{BC} \quad \mathbf{M} = \mathbf{CB} \quad \mathbf{M} = \mathbf{CA} \quad \mathbf{M} = \mathbf{AC}$$

Calculate the matrix  $\mathbf{M}$ .

[2 marks]

---

---

---

---

Answer \_\_\_\_\_

- 3 (c)** Triangle  $T_1$  has area 1.5 square units.

The transformation represented by  $\mathbf{M}$  maps triangle  $T_1$  to a triangle  $T_2$

Find the area of  $T_2$

[3 marks]

---

---

---

---

---

---

Answer \_\_\_\_\_

4 The function  $f$  is defined by  $f(x) = x^4 - 17x^2 - 5x - 12$

The equation  $f(x) = 0$  has one positive root,  $\alpha$ .

4 (a) Show that  $\alpha$  lies in the interval  $4.3 < x < 4.4$

[2 marks]

---

---

---

---

4 (b) Starting from the interval  $4.3 < \alpha < 4.4$ , use interval bisection **twice** to find an interval of width 0.025 within which  $\alpha$  must lie.

[3 marks]

---

---

---

---

---

---

---

Answer \_\_\_\_\_

**4 (c)** Taking  $x_1 = 4.3$  as a first approximation to  $\alpha$ , use the Newton-Raphson method to find a third approximation,  $x_3$ , to  $\alpha$ .

Give your answer to 3 decimal places.

**[5 marks]**

**Section C**  
**Mechanics**

Answer **all** questions in the spaces provided.

**10** Two cyclists,  $A$  and  $B$ , are travelling on horizontal ground.

Initially  $A$  is  $z$  metres due south of  $B$ .

The velocity of  $A$  is  $(2\mathbf{i} + 3\mathbf{j}) \text{ m s}^{-1}$  and the velocity of  $B$  is  $(3\mathbf{i} - 4\mathbf{j}) \text{ m s}^{-1}$ , where the unit vectors  $\mathbf{i}$  and  $\mathbf{j}$  are directed east and north respectively.

The distance between the two cyclists is a minimum after 28 seconds.

Find  $z$ .

Answer \_\_\_\_\_

5

11

The escape speed,  $v \text{ m s}^{-1}$ , for an object is the minimum speed needed for the object to escape the gravitational field of a planet.

A model for the escape speed is

$$v = kM^a r^b G^c$$

where:  $k$  is a dimensionless constant,

$M$  is the mass of the planet in kilograms,

$r$  is the radius of the planet in metres,

and  $G$  is the universal gravitational constant, which has units  $\text{m}^3 \text{kg}^{-1} \text{s}^{-2}$

Find the value of  $a$ , the value of  $b$  and the value of  $c$ .

[5 marks]

- 12** A disc, of mass 0.25 kg, is sliding on a smooth horizontal surface at a speed of  $4.8 \text{ m s}^{-1}$ .  
The disc hits a vertical wall that is perpendicular to its path.

The disc rebounds and travels in the opposite direction along its original path.

At time  $t$  seconds after the disc first makes contact with the wall, the magnitude of the force,  $F(t)$  newtons, acting on the disc is modelled as

$$F(t) = kt^2 (t - 0.1)^2$$

where  $k$  is a constant and  $0 \leq t \leq 0.1$

The model assumes that the disc is in contact with the wall for 0.1 seconds.

- 12 (a)** Calculate, in terms of  $k$ , the magnitude of the maximum force on the disc.

**[2 marks]**

---

---

---

---

Answer \_\_\_\_\_

- 12 (b)** Find, in terms of  $k$ , the magnitude of the impulse on the wall.

**[4 marks]**

---

---

---

---

---

---

---

---

Answer \_\_\_\_\_

**12 (c)** The coefficient of restitution between the disc and the wall is 0.6

Find the value of  $k$ .

**[4 marks]**
