Mark scheme

January 2020

---

Version: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from [oxfordaqaexams.org.uk](http://oxfordaqaexams.org.uk)

**Key to mark scheme abbreviations**

<b>M</b>	Mark is for method
<b>m</b>	Mark is dependent on one or more M marks and is for method
<b>A</b>	Mark is dependent on M or m marks and is for accuracy
<b>B</b>	Mark is independent of M or m marks and is for method and accuracy
<b>E</b>	Mark is for explanation
<b>√ or ft</b>	Follow through from previous incorrect result
<b>CAO</b>	Correct answer only
<b>CSO</b>	Correct solution only
<b>AWFW</b>	Anything which falls within
<b>AWRT</b>	Anything which rounds to
<b>ACF</b>	Any correct form
<b>AG</b>	Answer given
<b>SC</b>	Special case
<b>oe</b>	Or equivalent
<b>A2, 1</b>	2 or 1 (or 0) accuracy marks
<b>-x EE</b>	Deduct x marks for each error
<b>NMS</b>	No method shown
<b>PI</b>	Possibly implied
<b>SCA</b>	Substantially correct approach
<b>sf</b>	Significant figure(s)
<b>dp</b>	Decimal place(s)

Q	Answer	Marks	Comments
<b>1(a)</b>	Rotation about $y$ -axis through $90^\circ$	<b>M1</b> <b>A1</b>	Rotation identified $y$ -axis and $90^\circ$ oe  (More than one transformation scores 0 marks)
<b>1(b)</b>	$\mathbf{B} = \begin{bmatrix} 1 & 0 & 0 \\ 0 & 0 & 1 \\ 0 & 1 & 0 \end{bmatrix}$ $\mathbf{A} + \mathbf{B} + \mathbf{B}^{-1} = \begin{bmatrix} 2 & 0 & 1 \\ 0 & 1 & 2 \\ -1 & 2 & 0 \end{bmatrix}$	<b>B1</b>  <b>B1ft</b>	$\begin{bmatrix} 1 & 0 & 0 \\ 0 & 0 & 1 \\ 0 & 1 & 0 \end{bmatrix}$ seen or used for $\mathbf{B}$ or $\mathbf{B}^{-1}$  If not correct, ft on $\mathbf{A} + 2 \times \mathbf{B}$ 's $\mathbf{B}$
	<b>Total</b>	<b>4</b>	

Q	Answer	Marks	Comments
<b>3(a)</b>	$(\mathbf{a} \times \mathbf{b}) = (-5\mathbf{i} - 8\mathbf{j} + \mathbf{k})$ (Area of triangle=) $= \frac{1}{2}  \mathbf{a} \times \mathbf{b}  = \frac{1}{2} \sqrt{25 + 64 + 1}$ $(= \frac{1}{2} \sqrt{90}) = \frac{3}{2} \sqrt{10}$	<b>B1</b>  <b>M1</b>  <b>A1</b>	Correct $\mathbf{a} \times \mathbf{b}$ or correct $\mathbf{b} \times \mathbf{a}$  Valid method to evaluate $\frac{1}{2}  \mathbf{a} \times \mathbf{b} $ oe  A.G. CSO
<b>3(b)</b>	$(\mathbf{a} \times \mathbf{b}) \cdot \mathbf{c} = 3(-5) - 1(-8) + 7(1)$ $= 0$ $(\mathbf{a} \times \mathbf{b}) \cdot \mathbf{c} = 0$ so vectors are coplanar	<b>M1</b>  <b>A1ft</b>	Correct method to evaluate a relevant s.t.p.; ft earlier errors  Only ft on wrong sign(s) in c's $\mathbf{a} \times \mathbf{b}$ oe from part (a)
	<b>Total</b>	<b>5</b>	

Q	Answer	Marks	Comments
<b>5(a)(i)</b>	Direction vector ( $\mathbf{v}=\begin{bmatrix} 4 \\ -8 \\ 1 \end{bmatrix}$ )  $( \mathbf{v} =\sqrt{4^2 + (-8)^2 + 1^2} \quad (=9))$  Direction cosines: $\frac{4}{9}; -\frac{8}{9}; \frac{1}{9}$	<b>B1</b>  <b>M1</b>  <b>A1</b>	Correct direction vector identified  $\sqrt{4^2 + (-8)^2 + 1^2}$ or $\sqrt{3^2 + 1^2 + 2^2}$ oe  Correct direction cosines
<b>5(a)(ii)</b>	$\alpha = \cos^{-1}\left(\frac{4}{9}\right) = 63.6^\circ$	<b>B1ft</b>	Ft on c's $\frac{4}{9}$ ; ft answer must be correctly rounded
<b>5(b)</b>	$\begin{bmatrix} 3+4t \\ 1-8t \\ 2+t \end{bmatrix}$  $12 = \begin{bmatrix} 3+4t \\ 1-8t \\ 2+t \end{bmatrix} \cdot \begin{bmatrix} 1 \\ 1 \\ 1 \end{bmatrix} = 3+4t+1-8t+2+t$  $t = -2$  (P.V. of pt of intersection= $\begin{bmatrix} -5 \\ 17 \\ 0 \end{bmatrix}$ )	<b>B1</b>  <b>M1</b>  <b>A1</b>  <b>A1</b>	A correct position vector of general point on the line seen or used  Substitution of c's general point on $L$ into the equation of the plane and scalar product attempted  $t = -2$ oe  $\begin{bmatrix} -5 \\ 17 \\ 0 \end{bmatrix}$ oe
<b>Total</b>		<b>8</b>
